2 Change History

1.00	18 Sep 2017	Added description for free rounds API calls.
1.01	01 Feb 2018	Correction for success response for Freerounds/Add and Freerounds/Remove
1.02	21 Aug 2018	Added description for free rounds status check
1.03	19 Oct 2018	Fixed typo
1.04	09 Aug 2019	Updated list of providers, that support freeround feature
1.05	27 Jan 2020	Updated list of providers, that support freeround feature
1.06	03 Sep 2020	Updated list of providers, that support freeround feature
1.07	08 Oct 2020	Updated list of providers, that support freeround feature
1.08	11 Oct 2021	Updated list of providers, that support freeround feature
1.09	25 Nov 2021	Updated list of providers, that support freeround feature (BoomingGames removed)
2.0	20 Dec 2021	Added description for user's freerounds check request
2.1	25 Apr 2022	Added a more detailed description of response to Freerounds/Info
2.2	31 Jan 2023	Updated list of providers, that support freeround feature

2.3	06 Apr 2023	Added a more detailed description of merchant's name in [OPERATOR] field.
2.4	21 Apr 2023	Updated list of providers, that support freeround feature
2.5	28 Nov 2023	Updated list of providers, that support freeround feature
2.6	20 May 2024	Added FreeBonus param to Freerounds/Add request
2.7	30 May 2024	Updated list of providers, that support freeround feature
2.8	05 August 2025	Updated optional parameter for Pragmatic Play
2.9	14 January 2026	Updated list of providers that support BetLevel

3 1. Free rounds

3.1 1.1. Assign free round

[URL] has a form of:

```
https://[SERVER]/System/Api/[KEY]/Freerounds/Add?
&Operator=[OPERATOR]
&Login=[LOGIN]
&Games=[GAMES]
&Count=[COUNT]
&Expire=[EXPIRE]
&TID=[TID]
&Hash=[HASH]
{&BetLevel=[BETLEVEL]}
{typeOfBet=true}
```

where:

[OPERATOR] – merchant system name, capable of processing free rounds (see Appendix 1 or the "Name" field in the Game/FullList/? request).

[LOGIN] – User Login in API system or an array of multiple users logins.

[GAMES] – A game launch code or an array of game codes. Free rounds will be assigned to provided games.

Example for single game code:

```
...
&Games=steamtower_sw
...
```

Example for multiple game codes:

```
...
&Games[]=starburst_not_mobile_sw
&Games[]=tornado_sw
&Games[]=troll_sw
...
```

Example for multiple logins:

```
...
&Login[]=user1
&Login[]=user2
&Login[]=user3
```

...

[COUNT] – Free round count.

[EXPIRE] – Date and UTC time when free rounds will expire (YYYY-MM-DD 00:00:00).

[HASH] – MD5 checksum of the following data:

[OPERATOR]/Freerounds/[IP]/[TID]/[KEY]/[PWD]

Optional parameters:

[BETLEVEL] – bet multiplier for freeround. Default value, in case parameter is not provided: 1.

[typeOfBet] - For Pragmatic Play only, provides bonus buy feature to a user. If used, please send Count=1.

[TID] – transaction ID, sent in Freeround win request field game_extra, format FREEROUNDS_TID (OneWallet documentation)

Server response:

1. On success: 1
2. On error, error code and description is returned, according to Appendix 1

3.2 1.2. Remaining free rounds

[URL] has a form of:

[https://\[SERVER\]/System/Api/\[KEY\]/Freerounds/Info?](https://[SERVER]/System/Api/[KEY]/Freerounds/Info?)

&Operator=[OPERATOR]

&Login=[LOGIN]

&TID=[TID]

&Hash=[HASH]

where:

[OPERATOR] – merchant system name, capable of processing free rounds (see Appendix FR1 or the "Name" field in the Game/FullList/? request).

[LOGIN] – User Login in API system

[HASH] – MD5 checksum of the following data:

[OPERATOR]/Freerounds/[IP]/[TID]/[KEY]/[PWD]

Server response:

1. On success, JSON formatted data is returned
2. On error, error code and description is returned, according to Appendix 1 (see main API document)

Returns the following fields:

- ID
- UserID
- IDEternal
- FreespinsLeft (if supported by provider, otherwise awarded amount)
- Games
- ExpireDate
- BetLevel
- Win
- Status
- TID
- ExtID

3.3 1.3. Remove free rounds from user

[URL] has a form of:

[https://\[SERVER\]/System/Api/\[KEY\]/Freerounds/Remove?
 &Operator=\[OPERATOR\]
 &ExtID=\[ExtID\]
 &Login=\[LOGIN\]
 &TID=\[TID\]
 &Hash=\[HASH\]](https://[SERVER]/System/Api/[KEY]/Freerounds/Remove?&Operator=[OPERATOR]&ExtID=[ExtID]&Login=[LOGIN]&TID=[TID]&Hash=[HASH])

where:

[OPERATOR] – merchant system name, capable of processing free rounds (see Appendix FR1 or the "Name" field in the Game/FullList/? request).

[LOGIN] – User Login in API system

[ExtID] – TID of request that was used to give free rounds to user

[HASH] – MD5 checksum of the following data:

[OPERATOR]/Freerounds/[IP]/[TID]/[KEY]/[PWD]

Server response:

1. On success: 1
2. On error, error code and description is returned, according to Appendix 1 (see main API document)

In case you would like to receive zero credit please let the integration team know and this would be enabled.

3.4 1.4. Check free rounds status

[URL] has a form of:

[https://\[SERVER\]/System/Api/\[KEY\]/Freerounds/Check?](https://[SERVER]/System/Api/[KEY]/Freerounds/Check?) (see page 3)

&TID=[TID]

&FRTID=[FRTID]

&Hash=[HASH]

where:

[FRTID] – TID of freerounds add request

[HASH] – MD5 checksum of the following data:

Freerounds/Check/[IP]/[TID]/[KEY]/[PWD]

Server response:

1. On success, JSON formatted data is returned
2. On error, error code and description is returned, according to Appendix 1 (see main API document)

Returns the following fields:

- Login,
- Status,
- Win (if Status = Used)

3.5 1.5. Get user's freerounds

[URL] has a form of:

[https://\[SERVER\]/System/Api/\[KEY\]/Freerounds/ GetUserFreerounds?](https://[SERVER]/System/Api/[KEY]/Freerounds/ GetUserFreerounds?)

&Login=[LOGIN]

&TID=[TID]

&Hash=[HASH]

where:

[LOGIN] – User Login in API system or an array of multiple users logins.

[HASH] – MD5 checksum of the following data:

Freerounds/GetUserFreerounds/[IP]/[TID]/[KEY]/[PWD]

Server response:

1. On success, JSON formatted data is returned
2. On error, error code and description is returned, according to Appendix 1 (see main API document)

4 Appendix FR1. Free rounds operators

ID	Name	BetLevel Support	BetLevel Description	Several games at a time
9 9 8	EvoSW	+	available params on adding: Balance (mandatory), MaxWinnings (default value = x2 of Balance param) Balance and MaxWinnings are always in EUR, values are converted to the player's currency It's possible to set the value in a different currency: Balance[RUB]= and MaxWinnings[RUB]=	-
9 9 7	MG (Games Global)	+	closest available betlevel to (0.01 * betlevel)	+
9 9 1	BetSoft	-		+
9 8 7	TomHorn	-		-
9 8 6	MrSlotty	-		+
9 7 9	WorldMatc h	-		-
9 7 7	BoomingG ames	+	n available bet denomination in game (0.1 - 1,0.2 - 2,0.5 -3,...)	-
9 7 6	Habanero	+	bet in cents multiplied by number of lines(eur), for other currencies additionally multiplied by exrate	-
